

ELEMENTARY PHOTOSHOP

MAY 14TH - JULY 23RD 2009

THURSDAY | 6:00PM - 9:00PM

11 SESSIONS - 33 HOURS | BRANDON CLARIDA

\$299.00 + GST | LEVEL: BASIC

COURSE DESCRIPTION

Looking to learn the ins and outs of the most versatile photo editing software in the world? Adobe Photoshop is the industry standard tool for digital post-production, and you are invited to begin applying its magic to your images.

This course starts right from the beginning with software orientation, tool location and function, and basic correction. Under the guidance of photographer Brandon Clarida you will learn the building blocks of digital manipulation, from using layers and colour management, to photo restoration and special effects. Through focused assignments and one-on-one assessments, you will learn to get the most out of your images.

Students must have access to a laptop computer with Photoshop CS3 or CS4. Thirty-day trial versions of software are available to those who do not have Photoshop installed. This course is suited for basic level photographers that already have basic working computer knowledge. Elementary Photoshop teaches fundamentals necessary for some other SPAO courses and workshops. Enrolment is limited to ensure one-on-one attention.
