

# YOUNG PHOTOGRAPHERS' WORKSHOP

JULY 20TH - JULY 24TH 2009

MONDAY JULY 20TH - FRIDAY JULY 24TH

1:00PM - 4:00PM

5 SESSIONS - 15 HOURS | ANGELINA

MCCORMICK/ROB HUGHES | \$195.00 + GST

LEVEL: BASIC YOUTH

## WORKSHOP DESCRIPTION

Are you excited about making photographs? Come and learn how to get the most out of your compact digital camera or DSLR, and experience the traditional black and white medium as well.

This week long Young Photographers' Workshop will introduce you to the craft of photography, develop your skills and improve your ability to see and make images. Each student will learn tools of the trade such as how to use color to create dynamic compositions and handle the elements of time, motion and image content. Then they are taken back in time where they get to experience the mystery and magic of the darkroom.

Through assignments and lectures, students learn to photograph people, the urban landscape, architecture and conceptual subject matter. Students participate in shooting assignments and lab work. Both individual and group critiques are held daily.

Students must supply their own digital camera. All essential materials will be provided with tuition. Given the course material a level of maturity and self-direction is required. Youth 15 - 20yrs. This is a basic level course, which teaches fundamentals necessary for some other SPAO courses and workshops. Enrolment is limited to ensure one-on-one attention.
